DIGGERLID · PRO MAT INSIGHTS

# PRO Mat: how long people take to buy, and who buys Plus

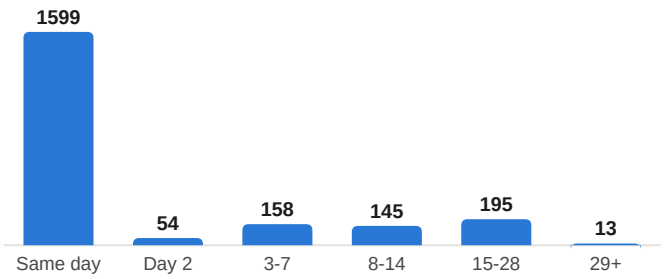

12 Oct 2026 · Shopify orders & sessions
23 Mar to 12 Oct 2026 · 2,249 paid PRO Mat orders

**The short version:** PRO Mat is a fast decision. Three in four buyers purchase the same day they first arrive, about 2 visits over about 4 days on average. Plus buyers decide the same way as Original buyers, but they come more from Meta, live more in Queensland, buy earlier in the day and spend about $160 more per order.

| 74% | 84% | 2.2 · 4 days | 91% |
|---|---|---|---|
| buy on the same day as their first visit | buy within 7 days · 90% within 14 | average visits and days to purchase | of PRO Mat buyers are new to DiggerLid |

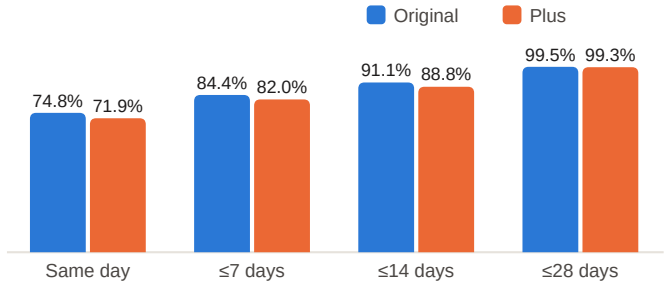

## 1. Conversion window

### Days from first visit to purchase (all PRO Mat orders)

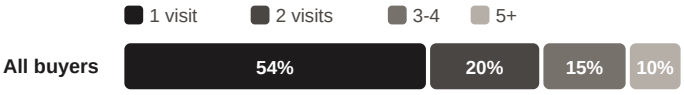

Orders with tracking data (n = 2,164). A second cluster at 15 to 28 days (195 orders) is larger than days 8 to 14: the "think about it, come back" group.

### Share bought by each checkpoint: Original vs Plus

Plus buyers take about half a day longer on average (4.3 vs 3.8 days). 90% have bought by day 15 for Plus and day 13 for Original.

### Number of visits before buying

Buyers who come back more than once (45%) average 3.7 visits over about a week. Original and Plus are near identical (2.2 visits each).

### New customers, by first traffic source

| SOURCE | ORDERS | SAME DAY | ≤7 DAYS | 90% BY DAY |
|---|---|---|---|---|
| Meta paid | 724 | 70% | 80% | **18** |
| Google organic | 603 | 79% | 89% | 9 |
| Meta organic / other | 330 | 72% | 83% | 13 |
| Direct / unknown | 241 | 77% | 83% | 14 |
| Email (Klaviyo) | 85 | 74% | 87% | 9 |

Meta buyers have the longest tail. Sale periods run longer too: Father's Day 68% same day and 90% by day 18, against 76% and day 14 in normal trading.

## 2. Purchase window for returning customers

| DAYS FROM FIRST DIGGERLID ORDER TO BUYING A PRO MAT (N = 205) | |
|---|---|
| Median | **269 days** |
| Middle half | 75 to 545 days |
| Within 30 days | 13% |
| Over a year | 37% |

**Read:** PRO Mat is mostly a new-customer product (91%). For existing customers it's a slow-burn cross-sell, typically 9 months after their first order, not a 30-day post-purchase add-on. Target past customers 3 to 18 months after their first order.

DIGGERLID · PRO MAT INSIGHTS

# Original vs Plus customers

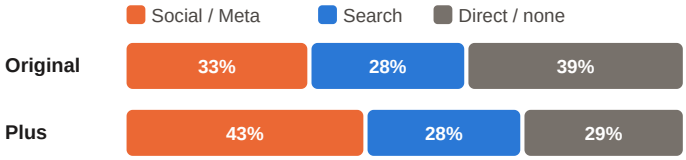

Same period for both: 6 Aug (Plus launch) to 12 Oct 2026
Original 291 orders · Plus 788 orders

## Side by side

| | ORIGINAL $219 | PLUS $299 |
|---|---|---|
| Spend per order | $294 | **$456** |
| Orders with 2+ mats | 8% | **32%** |
| Mat-only orders | 43% | **12%** |
| New to DiggerLid | 93% | 90% |
| First-time buyers who ordered again* | 1.5% | **3.7%** |
| Visits / days to buy | 2.7 / 4.8 | 2.2 / 4.3 |
| Used a discount code | 32% | 30% |
| Discount as % of gross | 4% | 9-12% |

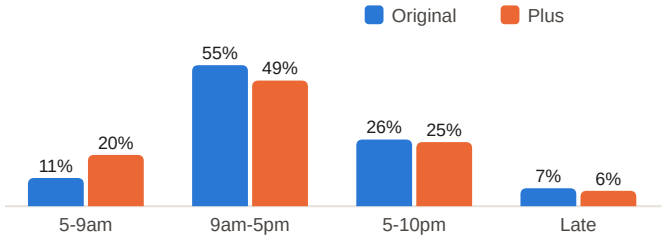

*Small numbers (4 vs 23 customers), so treat as early signal. Original visits are measured since Plus launched. Before Plus, Original buyers averaged 2.2 visits over 3.8 days.

## Where orders come from (order referrer)

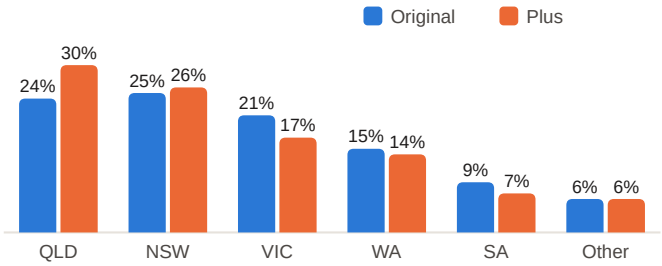

Plus leans on Meta creative (43% social). Original sells more on reputation, with 39% arriving direct.

## Time of day orders are placed

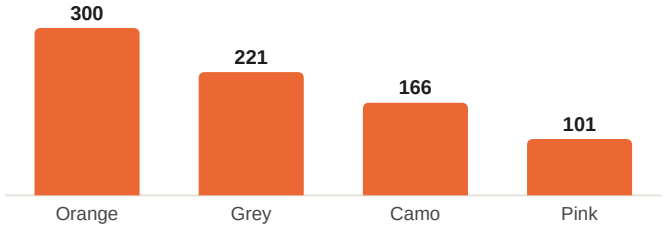

One in five Plus orders lands between 5 and 9am, nearly double Original's 11%.

## Orders by state

Plus over-indexes in Queensland. Orange and Camo are about one third QLD. Other includes TAS, ACT, NT and NZ (NZ about 2 to 4%).

## Plus orders by colour

Pink has the biggest basket ($552 per order), likely gift-led. Grey is evenly spread across states.

## The product page since Plus launched

| SESSIONS LANDING ON /PRODUCTS/PRO-MAT | BEFORE PLUS (23 MAR TO 5 AUG) | AFTER PLUS (6 AUG TO 12 OCT) | CHANGE |
|---|---|---|---|
| Sessions | 68,351 | 92,152 | +35% |
| Add to cart | 1.9% | 1.1% | **-41%** |
| Cart to purchase | 52% | 44% | **-8 pts** |
| Session conversion | 0.97% | 0.49% | **-49%** |

Shopify can't split the funnel by variant, because both live on one page. Part of the drop is likely colder Father's Day and broad-audience traffic, but it lines up with Original buyers now taking more visits to choose.

### What to do

- **Fix the choice on the product page.** Add a clear Original vs Plus comparison ("Plus = zips + reflective + 4 colours") and default the selector to the bestseller. The page now converts at half its old rate.
- **Attribution and retargeting.** Keep 7-day click (about 80% of Meta buyers). Run 28-day retargeting with a fresh proof creative at days 10 to 14 to catch the 15 to 28 day cluster.
- **Sell Plus as a system.** 32% already buy 2+ mats, so lead Plus ads with "zip two together" and test a 2-mat bundle.
- **Targeting.** Test Queensland-weighted Orange and Camo creative, and early-morning (5 to 9am) delivery for Plus. Use gift framing for Pink.
- **Past customers.** Cross-sell PRO Mat to customers 3 to 18 months after their first order, not in the first 30 days.

Sources: Shopify order customer journeys (2,249 paid PRO Mat orders, $0 orders excluded), ShopifyQL sales and sessions. "Days to purchase" counts from the first tracked visit (day 1 = same day). Shopify tracks journeys for about 30 days on one device, so longer and cross-device journeys are undercounted. Gift-buyer share was not measured. Original = SKU DLPROM1980; Plus = DLPROM1984 to 1987. No customer personal data was stored.
